

wood making work & injection

Plastic Injection, Woodworking & Ancillary Products

樹脂成型と木工加工

VANTAGE PRECISION PLASTICS, one of our subsidiaries, houses 25 molding machines from 50 to 600 tons to cater to our Clients' requirements. We also provide secondary process solutions (for example spraying, hotstamping and heat-induction etc.) to our Clients.

As part of our vertical integration, we also have an extensive wood-working setup plus other ancillary products like wire harness and packaging products done in-house in order to be cost effective and transfer more cost savings to our Clients to achieve a win-win situation.

50トンから600トンまでの樹脂成型機25台により、お客様のあらゆる御要望にも高い次元でお応えします。

鏡面仕上げのような特殊な成型品も可能です。また木工加工、塗装や印刷はもちろんホットスタンプ、高周波溶着、さらにワイヤーハーネス、包装材料までのグループ内、同一工場での一貫生産ができますので、お客様に満足していただける低コストを実現します。

product

Home Theatre Systems & AV Racks

Suited to larger rooms, the top range floor standing speakers will fill the largest spaces with music so richly detailed and so startlingly lifelike.

AV Rack is an integrated speaker system that neatly sits under the TV and uses the room to create a full sound experience. It is configured to direct multi-channel sound and providing an immersive surround effect from a single speaker without pack the room with boxes.

The naturally strong and solid, curved enclosures do not just look good; it resists vibrations and shields the drive unit assemblies from disturbances. It enables either wall mounting or free standing configurations depending on the consumer's preference. The outstanding design makes a perfect match with the flat-panel TV, and makes the speaker system an attractive addition to the décor.

product

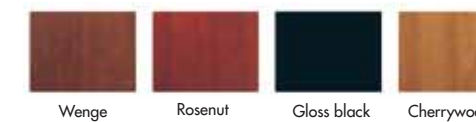

Mini Hi-Fi & Micro Hi-Fi Systems

In a medium-sized rooms, loudspeakers doesn't take up the floor area, Mini Hi-Fi system is an inspired choice whose sound can still command the space.

Micro Hi-Fi system is a pair of speaker systems which designed to fit easily with lifestyle and interior design needs. It is the seriously fun way to enhance the sounds that add so much to life.

Final Assembly

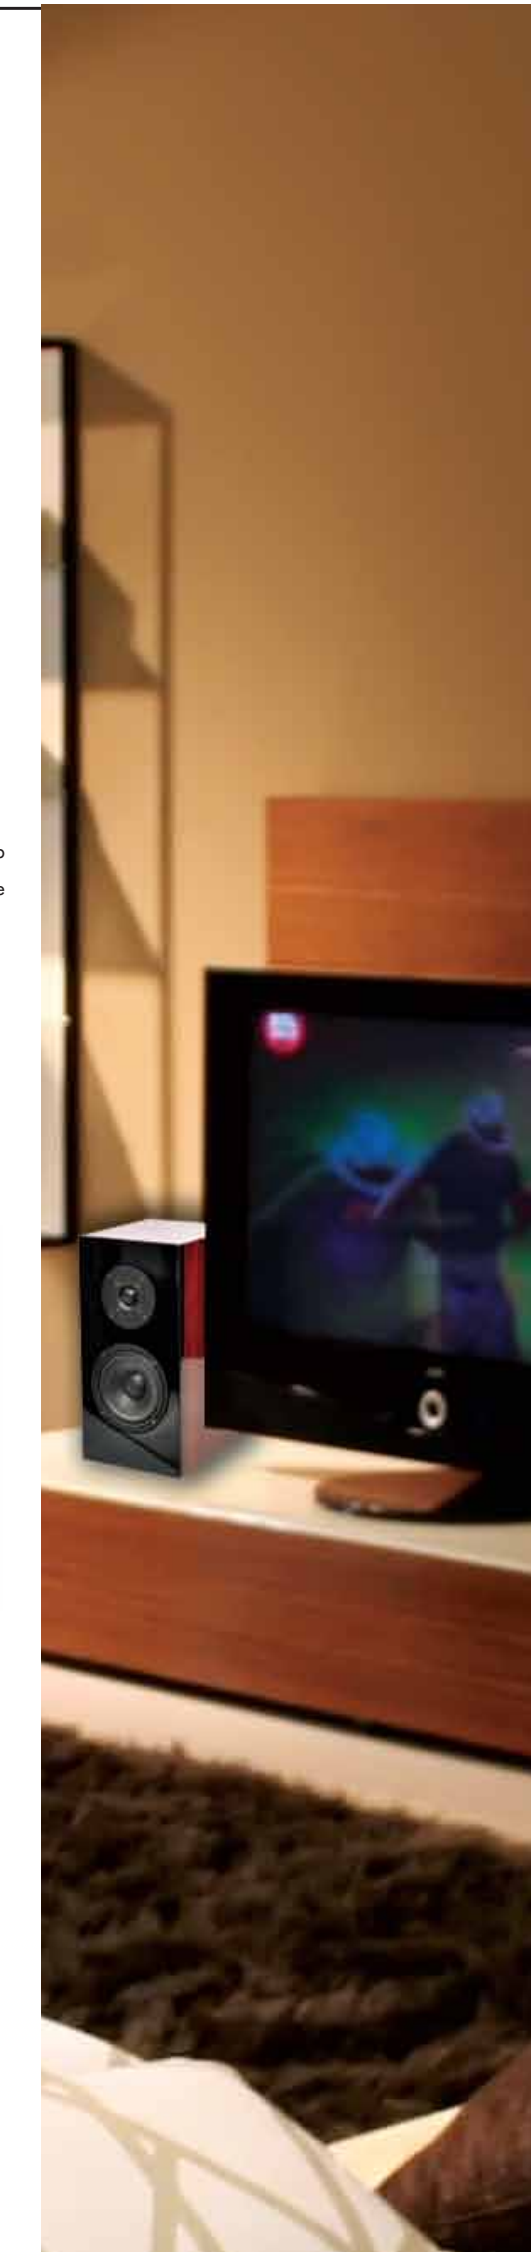

Assembly & Integration

企画から生産まで

We leverage our front end Electromechanical Design Consultation and our strong Supply Chain Management to provide the highest standard of integration design, quality and services at the most optimum costs to our Clients.

私達は企画や設計の段階において、日本人を含めたエンジニアがお客様との御打合せを通して、お客様の満足が得られるコストと品質と納期を実現できるようなサプライチェーンマネジメントを提供いたします。

Design & Development

製品開発

Our Engineering Innovations allow us to be responsive to our Clients' needs and our design capabilities range from subsystems (modules) and full turnkey product designs to even cost reductions for existing ones. We work aggressively to exceed our Clients' goals and time-to-market expectations.

私たちの日本人を含んだエンジニアは、お客様のあらゆる御要望に満足していただく為に迅速に且つ様々な提案をして、生産性の向上と低価格の実現に積極的に取り組みます。

また市場の変化に対しても、お客様の御要望に迅速に対応します。
